## ***Experience High-Quality Printing Inkjet Printer Ink.***

Liquid ink is often used in inkjet printers and can be found in dye-based or pigmented forms.

Our high-quality inkjet printer ink is used to print on virtually any substrate material including paper, plastic, wire, cable, metal, resin, glass, and more. Typical applications for inkjet coding include printing batch codes, barcodes, expiration dates, and lot numbers. Major industrial clients are food & beverage, extrusion, pharmaceutical, paper, perfumes & cosmetics, and more. We welcome inquiries from the international market.

We have a full-time engineering team whose sole purpose is to analyze the printers.

And along with the Sales team to advise you with different options which further enable you to optimize the running of printers.

We also supply TIJ cartridges, TTR Ribbons and packaging & label solutions. Marc is a one stop shop to all your coding and marking needs.
